

# SCHOOL TIPS FOR THE START OF THE SEMESTER

## Go To Class

1

### Take a nice campus walk!

It can be hard sometimes but get up and go you will thank yourself later.

PS. Sometimes at the end of the semester teachers give extra credit for good attendance.

## Take Notes / Actively Listen

2

### I know your phone is tempting.

But hearing and writing the material down will help you learn it so much quicker. And learning it quicker means less studying later!

## Study in Advance

3

### Get some rest before the test!

Do not spend all of Thursday studying for that Friday Exam! If you start on Monday you can take it little bits at a time and also help you better hold the information for longer. (maybe even until finals)

## Meet People In The Class

4

### You can study with them!

Turn to the person to your right and your left... one of you most likely was paying attention and/or understands that confusing topic. You can also meet up outside of class to really nail down the lesson. Also, friendships outside of your chapter can be fun!

## Talk to Sisters / Brothers

5

### They may have taken the same class.

Some people save old notes and/or textbooks which can be super useful when starting new classes. Send questions in your group chats and never be scared to ask for help.

## Have Fun.

6

### it may seem lame..

...but work to engage with the stuff you are learning. A lot of classes have real-life applications that go along with the course material. Also, remember that college is not ONLY classes. So go grab sonic with a friend and take a break sometimes!
